

Electricity Facts Label (EFL)
Green Mountain Energy Company (REP Cert. No. 10009)
Renewable Rewards® Solar Max 12
Oncor Electric Delivery service area
Date: 08/01/2026

**Electricity
price**

Average monthly use:	500 kWh	1000 kWh	2000 kWh
Average price per kWh:	21.2 ¢	19.3 ¢	18.4 ¢

This price disclosure is based on the following components:

Base Charge: \$14.95 per billing cycle
Energy Charge: 11.3726¢ per kWh
Oncor Electric Delivery Delivery Charges: \$4.06 per billing cycle and 6.0295¢ per kWh

TDU Delivery Charges include all recurring charges passed through without mark-up.
This price disclosure is an example based on average prices - your average price for service will vary according to your usage. The price you pay each month will consist of the Base Charge, Energy Charge, and TDSP Delivery Charges. Average prices per kWh listed above do not include credits for excess distributed renewable generation.

**Other Key
Terms and
questions**

See Terms of Service for a full listing of fees, deposit policy, and other terms.

You will receive a Renewable Rewards Credit on your bill for the excess energy delivered by your eligible renewable energy system to the grid over a monthly billing cycle.

The credit amount will be calculated using 15-minute interval data over the applicable monthly billing cycle. For each 15-minute interval data read, the credit amount will be determined by multiplying (a) the out-flow kWh quantity of excess energy reported by the TDSP over the applicable 15-minute interval by (b) the corresponding Electric Reliability Council of Texas (ERCOT) 15-minute Real-Time Settlement Point Price (RTSPP) in dollars per kWh for your applicable Load Zone. If the RTSPP is less than zero for a given 15-minute interval, the credit amount will be zero for that interval. The total credit amount applied to your bill will be the sum of the credit amounts calculated for each 15-minute interval data read over the applicable monthly billing cycle.

You can find your applicable Load Zone by visiting Green Mountain's Renewable Rewards Solar Max program page at <https://greenmountainenergy.com/renewablerewards>. The ERCOT 15-minute RTSPP for each Load Zone are available at: http://www.ercot.com/content/cdr/html/real_time_spp

In the event Green Mountain receives incomplete interval data from your TDSP, Green Mountain may estimate your out-flow kWh for missing periods based on the monthly meter read reported by the TDSP. When there is a difference in out-flow kWh between the monthly meter read and the monthly total of the interval data, the difference will be allocated over missing intervals and the estimated out-flow kWh will be used to calculate credit amounts applied to your bill.

See the Terms of Service for additional details for customers enrolled on a Renewable Rewards product.

Disclosure Chart	Type of Product	Fixed Rate
	Contract Term	12 months
	Do I have a termination fee or any fees associated with terminating service?	Yes, in the amount of \$150.
	Can my price change during the contract period?	Yes
	If my price can change, how will it change and by how much?	Your price may change only to reflect actual changes in TDSP charges, changes to the Electric Reliability Council of Texas or Texas Regional Entity administrative fees charged to loads, or changes resulting from federal, state or local laws or regulatory actions that impose new or modified fees or costs on us that are beyond our control.
	What other fees may I be charged?	If applicable, we may bill you for certain non-recurring, late payment, insufficient funds, disconnect notice, disconnect recovery, or other fees as described in Itemization of Non-Recurring Fees and Charges section of your Terms of Service.
	Is this a pre-pay or pay in advance product?	No
	Does Green Mountain Energy Company (REP Cert. No. 10009) purchase excess distributed renewable generation?	Yes; customers enrolled on the Renewable Rewards product that meet the eligibility requirements will receive credits for excess distributed renewable generation. Renewable Rewards product availability is subject to change at Green Mountain's discretion. See the Terms of Service section regarding the Renewable Rewards Buy-Back Products for eligibility requirements.
	Renewable Content	This product is 100% renewable, sourced from national solar facilities.
	Statewide average for renewable content	The statewide average for renewable content is 37%.

¹ With the purchase of this Green Mountain Energy[®] electricity product, you are supporting cleaner electricity by matching 100% of your annual paid electricity usage with an equivalent amount of electricity produced by renewable sources of electricity generation in the United States. Green Mountain will purchase and retire renewable energy certificates (RECs) representing the environmental attributes associated with renewable energy generation for 100% of your paid usage.You will not have electricity from a specific generation facility delivered directly to your service address, but your purchase ensures that renewable energy equal to 100% of your paid electricity usage is produced using renewable resources on an annual basis. Renewable resource availability varies hour to hour and from season to season, as does our customers' use. We will rely on system power from the grid to serve our customers' minute by minute consumption but will use RECs to ensure that enough of the applicable Green Mountain Energy electricity blend is delivered to power systems in the United States to match our customers' actual annual electricity purchases. We may take up to three months following the close of a calendar year to make up any deficiency in a particular resource promised in connection with the electricity product you choose.
