

Electricity Facts Label (EFL)

Light Energy, LLC

Meter Earner + Battery Plan

Service Area - ONCOR

September 24, 2026

Electricity Price	Average Monthly Use	500 kWh	1000 kWh	2000 kWh
	Average Price per kWh	4.4¢	11.1¢	14.9¢
	Average price is calculated as (Energy consumption * (Energy Rate + TDU Delivery Charges) + TDU Delivery Base Charge + Base Charge - (Exported Energy * Buyback Rate) - Battery Credit) / Energy Consumption.			
	The Average Price per kWh includes a Buyback Credit for 840 kWh of Exported Energy and a Battery Credit for 13.5 kWh of Battery Capacity, based on average monthly Exported Energy and Battery Capacity for Meter customers, and excludes rolled over credits. Your average price per kWh will depend on your usage, Exported Energy, Battery Capacity, and the pricing components below.			
	Base Charge	\$14.95 per month		
	Energy Rate	12.57¢ per kWh		
	Buyback Rate	8.00¢ per kWh		
	Battery Credit	\$2.00 per kWh of Battery Capacity per month		
	ONCOR Delivery Charges	6.02950¢ per kWh \$4.06 per month		
	The price you pay each month will consist of the Base Charge, Energy Charge, and ONCOR (TDU) Delivery Charges. TDU Delivery Charges include all recurring charges passed through without mark-up, and any nonrecurring fees from the TDU will be passed through, also without mark-up. This price disclosure is an example based on average prices - your average price for electricity service will vary according to your usage. The average price per kWh includes the PUC Assessment. Prices are exclusive of state and local sales taxes and the Gross Receipts Reimbursement. Exported Energy is electricity your home sends back to the grid. The TDU measures your Exported Energy through a bi-directional meter and provides the readings to us each billing cycle. Buyback Credits are calculated by multiplying your Buyback Rate by your Exported Energy and can offset up to 100% of your Energy Charges each month (your Buyback credits cannot be applied to your Base Charge, TDU Delivery Charges, or any other charge, tax or fee). Buyback Credits will be applied to your monthly bill when we receive a meter read from your TDU for your Exported Energy, which may take up to 3 full billing cycles for the first meter read if you have a new installation. Any unused credits will be rolled over and automatically applied to future bills to offset any remaining Energy Charges. Rolled over credits have no cash, credit, or other redemption value and are non-transferable. Battery Capacity is the usable amount of electrical energy that an eligible energy storage system is capable of storing and subsequently discharging, measured in kilowatt-hours (kWh), as specified by the manufacturer under standard operating conditions. Battery Credit requires participation in the Meter Battery Program. See Light Energy's Terms of Service for details.			

Other Key Terms and Questions	See Light Energy's Terms of Service for a full listing of fees, deposit policy, and other terms.	
Disclosure Chart	Type of Product	Fixed
	Contract Term	12 Months
	Do I have a termination fee or any fees associated with terminating service?	Yes, \$150.
	What other fees may I be charged?	Please see the "Itemization of Non-Recurring Fees and Charges" section of the Terms of Service for non-recurring fees.
	Is this a pre-pay or pay-in-advance product?	No
	Can my price change during contract period?	Yes
	If my price can change, how will it change and by how much?	The average price may change to reflect actual changes in TDU charges, changes to the Electric Reliability Council of Texas or Texas Regional Entity administrative fees, and the termination of the Battery Program or your participation in it. Your Energy Rate from Light Energy will not change unless federal, state or local laws or regulatory actions impose new or modified fees or costs on Light Energy that are beyond Light Energy's control. The price applied in the first billing cycle may be different from the price in this EFL if there are changes in TDU charges; changes to the Electric Reliability Council of Texas or Texas Regional Entity administrative fees charged to loads; or changes resulting from federal, state or local laws or regulatory actions that impose new or modified fees or costs that are outside our control.
	Does Light Energy purchase distributed renewable generation?	Yes
	Renewable Content	100%
	The statewide average for renewable content	35.2%
