Energy Charge	8.8000 ¢ per kWh
Base Charge	\$9.95 per billing cycle
TDU Delivery Charges	\$4.06 per billing cycle
TDU Delivery Charges	6.0295 ¢ per kWh

This price disclosure is an example based on average prices - your average price per kWh for electricity service will vary according to your actual usage, Excess Energy Exported, and the above pricing components.

Your real-time energy usage will be netted against your real-time onsite solar energy and/or battery energy generation. If you generate and export to the grid more energy than you consume in real-time (Excess Energy Exported), you will receive a bill credit for the net Excess Energy Exported (Excess Energy Credit). You will receive an Excess Energy Credit on your bill of 3.00 ¢ per kWh for any Excess Energy Exported.

Your monthly Excess Energy Credit amount will be determined by multiplying the Excess Energy Credit rate per kWh by the total kWh of Excess Energy Exported. If in any billing period your Excess Energy exceeds your consumed usage, you will receive credit for the surplus in your Frontier Utilities customer account in the form of a bill credit. These bill credits will be applied on your next monthly bill from Frontier Utilities in the event of a negative balance.

Excess Energy Credits can only be applied to your Frontier Utilities bill. The credits are non-transferable and carry zero cash value. Any remaining credits in your account if you cancel your account are not available for cash.

TDU Delivery Charges include all recurring charges passed through without mark-up. For updated TDU Delivery Charges please go to <https://www.frontierutilities.com/Resource/TDSP-Charges>. Some locations may be subject to a TDU Underground Facilities and Cost Recovery charge authorized by their city that is not included in the total average prices shown. For more details, see your TDU service tariff for a listing of cities and authorized charges.
