

Electricity Facts Label (EFL)
Green Mountain Energy Company (REP Cert. No. 10009)
Solar All Nighter 12
Oncor Electric Delivery service area
Date:09/01/2026

**Electricity
price**

Average monthly use:	500 kWh	1000 kWh	2000 kWh
Average price per kWh:	17.2¢	16.8¢	16.5¢

Average price calculation is based on consumption profile over 12 months of 42% of consumption at nighttime as defined below*.

This price disclosure is based on the following prices:

Base Charge:	\$0.00	per month
Day time Energy Charge:	11.1574¢	per kWh
Nighttime Energy Charge:	9.1574¢	per kWh
Oncor Electric Delivery Delivery Charges:	\$4.06	per billing cycle and 6.0295¢ per kWh

Oncor Electric Delivery Charges include all recurring charges from Oncor Electric Delivery passed through without mark-up.

Your average price per kWh each month is determined by using the energy charge above and the predetermined formula.

Price per kWh = (Base Charge + (Monthly billed daytime kWh usage x Daytime Energy Charge) + (Monthly billed nighttime kWh usage x Nighttime Energy Charge) + (Oncor Electric Delivery Charges))/ Monthly billed kWh usage

This price disclosure is an example based on average service prices - your average price for electricity service will vary according to your usage.

In the event Green Mountain Energy receives incomplete interval data from your Transmission and Distribution Service Provider, Green Mountain Energy may estimate your usage for missing periods based on historical data from your meter. A multi-day average of recent interval data will be used to estimate usage for missing intervals and the estimates will be used to calculate your monthly bill. When there is a difference between the monthly meter read and the monthly total of the actual or estimated interval data, the usage difference will be allocated based on your usage profile for that billing period. If less than 50% of the interval data is received from the Transmission Distribution Service Provider or is estimated by Green Mountain Energy, the usage difference between the monthly meter read and monthly total of the actual or estimated interval data will be applied as 58% at the Daytime Energy Charge and 42% at the Nighttime Energy Charge.

Some locations may be subject to a special charge that is not included in the total average price shown for electric service, such as a charge for underground facilities authorized by their city. For more detail see the Oncor service tariff for a listing of cities and authorized charges.

*Nighttime Energy Charge applies to usage from 8:00 PM to 6:00 AM every day.

**Other Key
Terms and
questions**

See Terms of Service statement for full listing of fees, deposit policy, and other terms.

**Disclosure
Chart**

Type of Product	Fixed
Contract Term	12 Months
Do I have a termination fee or any fees associated with terminating service?	Yes. \$150. Applies through the end of the contract term. This fee does not apply if the customer moves, and provides a forwarding address and other evidence that may be requested to verify that the customer moved.
Can my price change during the contract period?	Yes, but only in the limited circumstances described below.
If my price can change, how will it change and by how much?	Your price may change only to reflect actual changes in TDSP charges, changes to the Electric Reliability Council of Texas or Texas Regional Entity administrative fees charged to loads, or changes resulting from federal, state or local laws or regulatory actions that impose new or modified fees or costs on us that are beyond our control
What other fees may I be charged?	If applicable, we may bill you for certain non-recurring, late payment, insufficient funds, disconnect notice, disconnect recovery, or other fees as described in Itemization of Non-Recurring Fees and Charges section of your Terms of Service.
Is this a pre-pay or pay in advance product?	No
Does REP purchase excess distributed renewable generation?	Yes; customers enrolled on the Renewable Rewards product that meet the eligibility requirements will receive credits for excess distributed renewable generation. Renewable Rewards product availability is subject to change at Green Mountain's discretion. See the Terms of Service section regarding the Renewable Rewards Buy-Back Products for eligibility requirements.
Renewable Content	This product is 100% renewable, sourced from national solar facilities.
What is the statewide average for renewable content?	37%
Green Mountain Energy Company (PUCT Cert. No. 10009) P.O. Box 699, Houston, Texas 77001-0699 1-866-785-4668 (7 days a week, 7 a.m. to 10 p.m. CST)), www.greenmountain.com. ¹ With the purchase of this Green Mountain Energy® electricity product, you are supporting cleaner electricity by matching 100% of your annual paid electricity usage with an equivalent amount of electricity produced by renewable sources of electricity generation in the United States. Green Mountain will purchase and retire renewable energy certificates (RECs) representing the environmental attributes associated with renewable energy generation for 100% of your paid usage. You will not have electricity from a specific generation facility delivered directly to your service address, but your purchase ensures that renewable energy equal to 100% of your paid electricity usage is produced using renewable resources on an annual basis. Renewable resource availability varies hour to hour and from season to season, as does our customers' use. We will rely on system power from the grid to serve our customers' minute by minute consumption but will use RECs to ensure that enough of the applicable Green Mountain Energy electricity blend is delivered to power systems in the United States to match our customers' actual annual electricity purchases. We may take up to three months following the close of a calendar year to make up any deficiency in a particular resource promised in connection with the electricity product you choose.
