	The Average Price per kWh is based on TXU Energy customers on similar Time-of-Use products over the past three years within this TDU service area. It reflects that an average of 41.16% of electricity usage occurred during the Free Nights Savings period, as defined below, and an average of 12.73% of electricity usage occurred during the Cool Summer Bonus period, as defined below. Your actual average price per kWh will vary based on your usage and the pricing components listed below.

TDU Delivery Charges Per Month and TDU Delivery Charges Per kWh will be passed through to customer as billed from the Transmission and Distribution Utility (TDU).																			
Free Nights Savings: From 9:00 p.m. through 4:59 a.m. each day, you will receive a 100% credit on all Energy Charges.																			
Cool Summer Bonus: You will receive an additional 25% credit on all Energy Charges during the Free Nights Savings period during July, August, and September. This additional credit will never exceed your total daytime energy charges (5:00 AM–8:59 PM) and has no cash value.																			
Your average price per kWh each month is determined using the formula below based on your Monthly Billed kWh Usage.																			
Price per kWh = [Base Charge + TDU Delivery Charges per Month + (Monthly billed kWh Usage multiplied by the (Energy Charge + TDU Delivery Charges per kWh)) - (Energy Charge multiplied by Monthly billed kWh Usage multiplied by the Free Nights percentage) - (Energy Charge multiplied by Monthly billed kWh Usage multiplied by the Cool Summer Bonus eligible percentage multiplied by 25%)] / Monthly billed kWh Usage																			
The total kilowatt-hour usage shown on your monthly invoice (Billed Usage) is provided by the TDU. Usage is determined from interval data from your advanced meter (Interval Data) and is also provided by the TDU. If the Billed Usage and Interval Data do not match: 1) any missing intervals in the Interval Data will first be determined using market information for your usage profile, then these intervals will be proportionately adjusted so the sum of all intervals equal the Billed Usage provided by the TDU; or 2) if there is no missing interval information, each interval of the Interval Data will be proportionately adjusted so the sum of all intervals equal the Billed Usage provided by the TDU.																			
Average prices per kWh listed above do not include facility relocation fees or other charges ordered by a municipality. For information, please go to txu.com/municipalfees .
