Your average price per kWh each month is determined using the formula below based on your Monthly Billed kWh Usage.																			
Price per kWh = (Base Charge + TDU Monthly Delivery Charge + (Daytime kWh usage x Daytime Energy Charge) + (TDU Per kWh Delivery Charges x Daytime kWh usage))/Monthly billed kWh usage																			
The total kilowatt-hour usage shown on your monthly invoice (Billed Usage) is provided by the Transmission and Distribution Utility (TDU). Usage for each time-of-day billing period shown above is determined from interval data from your advanced meter (Interval Data) and is also provided by the TDU. If the Billed Usage and Interval Data do not match: 1) any missing intervals in the Interval Data will first be determined using market information for your usage profile, then these intervals will be proportionately adjusted so the sum of all intervals equal the Billed Usage provided by the TDU; or 2) if there is no missing interval information, each interval of the Interval Data will be proportionately adjusted so the sum of all intervals equal the Billed Usage provided by the TDU.																			
Some cities have authorized a TDU Underground Facilities Cost Recovery or similar charges that are not included in the average price shown above. For more information about these charges, please go to ambitenergy.com/municipalfees.
