Excess Energy is energy sent to the grid when your renewable energy system produces more electricity than your home uses in real-time. The TDU measures your Excess Energy through a bi-directional meter and sends us your meter read each billing cycle.																		
Buyback Credits are calculated by multiplying your Buyback Rate by your Excess Energy and can offset up to 100% of your Energy Charges each month (excluding base charge, TDU charges, and all other taxes and fees). Buyback Credits will be applied to your monthly bill when we receive a meter read from your TDU for your Excess Energy, which may take up to 3 full billing cycles for the first meter read if you have a new installation. Any unused credits will be banked and automatically applied to future bills to offset any remaining Energy Charges. You may accumulate up to \$1000 in banked credits and keep them if you are enrolled on an eligible TXU Energy solar buyback plan. Banked credits have no cash, credit, or other redemption value and are non-transferable.																		
Average prices per kWh listed above do not include facility relocation fees or other charges ordered by a municipality. For information, please go to txu.com/municipalfees .																		
Other Key Terms and Questions	Each month you will also be billed all taxes, including sales tax, and reimbursement for the state miscellaneous gross receipts tax as applicable.
